pound. Above this value there is an increase of 16 cents, per pound and 5 per cent ad valorem. This large increase would apply only to the finest kinds of goods not in general use, and made of fine high duty wools. It was an error of the present law to classify these goods as if they were made of low duty wools. The proposed change is just, and will permit the manufacture of the, finest kinds of flannels, etc., in this country.

On dress goods of all kinds entering into general use among all chasses of our people, and one of the most inportant, though recently introduced branches of wool manufacture the rates of duty have been increased. This inof duty have been increased, This in-crease has been accomplished by lower-

cents, shall pay 6 cents per square yard and 40 per cent ad valorem.

The increase on the higher priced goods is effected only by lowering the limit at which the higher rate is applied. This involves an increase in the duty of 20 per square yard on all goods ranging from 15c to 20c. Above 20c the rate is the same as under the present law.

The only increase on all-wood dress goods, etc., is an advance in the specific rate from 0c to 11c per square yard.

goods, etc., is an advance in the specific rate from 9c to 11c per square yard.

These changes are all in harmony with the evident purpose of the bill to encourage the production of finer goods, but not to increase the cost of the cheaper kinds: except as to the proposed increase of rates on the lower classes of dress goods. The reason for this variation from the general purpose of the law is not obvious, unless it is proposed, by attimulating the production of these fabrics at home, to secure throactive competition, an absindant supple. active competition, an absordant supply son.

at low prices.

The clothing duties have been wisely modified so as to give adequate protection to a large class of persons employed in the manufacture of garments, and prevent the destruction of this industry y competition with the low wages of sumany. The increase is from 35 to 45 per cent ad valorem on men's gar ments, and from 40 to 45 per cent mi pets of all kinds there is no change,

The changes proposed for manufactured woolens are also important for both grower and manufacturer, but as a rule do not increase rates on the cheaper grades of goods or such as go into general consumption.

The first, and one of the most important, change is the classification of worsted with woolen cloths, shawls, etc. Worsted goods, although made of fine high duty goods and by costly processes, have hitherto—under a ruling of the Treasury Department—been entered at the low duty prescribed for flannels,

The same change has been made in the classification of yarns, knit goods and Balmorals, and for the same reason. Should the new bill become a law, a prompt revival of these branches of wool manufacture would follow, with increased demand for American wool and their reserve funds, amounting to half a million dollars, have been pooled. When your collars and cuffs are rough and irritate your flesh, when you find the fine linen eaten away in spots, displaying the coarse filling, this is the cause:-They have been washed with ordinary soap, whose cleansing properties are due to caustic soda and elbow grease; either of these will produce the above, and the starch makes them feel as if you had a saw around your neck. Pyle's Pearline does away with the rubbing, hence it saves all-wear and tear in the wash. It is as harmless as the finest imported castile soap. Linens washed with it are perfectly white and last many times as long as if washed in the old rubbing, twisting, wrecking way.

Peddlers and some unscrupulous grocers are offering imitations which they claim to be Pearline, or " the same as Pearline." It's false -they are not, and besides are dangerous. PEARLINE is never peddled, but sold by all good grocers.
